ABOUT ME

Highly focused, energetic and enthusiastic Software Engineering graduate (CGPA 3.56) from COMSATS University, Wah Campus. Currently working as an Associate Software Engineer at Nitensclue, contributing to core MERN Stack products, with a strong interest in MERN Stack development.

EDUCATION

Bachelor of Science in Software Engineering

COMSATS University Islamabad, Wah Campus [9/2021 – 09/2025]

Address: Wah Cantt, Punjab, (Pakistan): <https://cuiwah.edu.pk/>

Final Grade: 3.56/4.00 (First Class), top-tier graduate within a 2025 cohort of 655 undergraduates.

Relevant Courses (Grades): Object Oriented Programming (A), Statistics and Probability Theory (A), Data Structures and Algorithms (A-), Data Communications and Computer Networks (A), Scripting Languages (A), Machine Learning (A), Artificial Intelligence (A), Digital Logic Design (A), Programming Fundamentals (B+).

WORK EXPERIENCE

Associate Software Engineer

MERN STACK, Nitensclue [26/01/2026 – Present], **Country:** Pakistan

- Working on the Tax Audit project at Nitensclue, collaborating with the SQA and development team, reporting daily to the Project Manager, and contributing to the development of the Revenue, Checkout, Stripe subscription pages, and the Pro version of the SaaS website.
- Link: <https://app.unclekam.com> — See more at: <https://unclekam.com>

Software Engineer (Intern)

NEXT.JS, Mudasir poultry service (FYP) [14/09/2024 – 09/06/2025], **Country:** Pakistan

- Developed a full-stack NEXTJS poultry management system with real-time monitoring, admin dashboard, and automated feeding workflows.

- See more at: <https://cdc.cuiwah.edu.pk/Event/Project/6177>

Freelancing

Software Engineer, Remote [15/11/2023 – Present]

Country: Pakistan

- Gathered business requirements and developed full-stack MERN applications including e-commerce platforms, job portals, and management systems.

1.Custom Ecommerce Solution (2x), (Mern Stack & Nextjs) – Developed admin panel and e-commerce websites with Stripe integration tailored to business requirements. [Live Demo 1](#) [Live Demo 2](#)

2.Job Portal, (Mern Stack) – Developed and integrated multiple frontend pages with backend APIs in a MERN-based job portal. [Live Demo](#)

3.Advanced Scientific calculator, (Html/css/js) – Built 6 specialized calculators, including ANOVA, Chi-Square, and Confidence Interval, for advanced statistical analysis. [Live Demo](#)

MANAGEMENT AND LEADERSHIP EXPERIENCE

Team Leader

Freelancing, Remote – [2024]

Country: Pakistan

- Understanding business needs, managed client communication, defining project scope, budget, and deadlines.
- Led a team of two developers to deliver projects on time and in line with requirements.
- Ensured client satisfaction while maintaining strong team coordination and morale.

Associate Researcher

Software Engineering, Comsats University – [2024]

Country: Pakistan

- Conducted technical analysis and documentation of 5G communication systems, including near-field and far-field channel models, using MATLAB and Python.

PERSONAL PROJECTS

Developed and deployed full-stack MERN applications with real-time features, third-party integration and scalable backend systems.

1.Plant Disease Detection – Built a full-stack web app with MERN for farmers to monitor crop health in real-time. Integrated a TensorFlow model via REST API to classify leaf images.

2.Football Object Detection – Developed a MERN web application to track football objects in real-time using a backend API for object detection.

3.Football Player Detection – Created a full-stack MERN system to track football players with live updates and performance dashboards.

4.Chicken Disease Detection by Posture – Built a MERN application to monitor chicken posture and detect potential illnesses. AI model served through backend APIs with live dashboard updates.

5.WebSockets Chat App: Developed a real-time chat application using MERN stack and Socket.IO for instant messaging. <https://gen-zatting.onrender.com>

SKILLS AND ABILITIES

- **Technology/Software:** Git/Github, MS Office, Google Colab and Figma/Canva.
- **Web Development:** Mern Stack, Nextjs, FastAPI, REST APIs & JWT Auth, PostgreSQL/MongoDB, third-party integration and WebSockets/Socket.IO.
- **Programming Languages:** Python, JavaScript, TypeScript, SQL.
- **Deployment:** Vercel, Render, Railway, Heroku and Hostinger vps.
- **Soft Skills:** Excellent English communication skills, Self-confidence, Good Researcher of client business needs.
- **Languages:** English (Professional Working Proficiency), Urdu (Native), Chinese (Chat)

COURSES AND CERTIFICATIONS
