SUMMARY

With over a year of freelancing experience alongside my studies, I am a fresh Software Engineering graduate. My primary expertise lies in the **MERN stack** and Next.js, but I can also work with frameworks like FastAPI and Flask. I have hands-on experience developing and deploying machine learning and AI solutions, integrating third-party gateway APIs, and building real-time applications with WebSockets. Additionally, I possess a solid understanding of data structures and algorithms, software engineering principles, and system design.

EXPERIENCE

Software Engineer - System Developer

Client Project (Job Portal, Nextjs/Fast/Supabase)

📅 09/2025 - Present

- Building an **enterprise-level** job portal system (details confidential).

Team Leader and Developer

Freelancing Project (E-Commerce, MERN STACK)

🔗 rareproducts.store | <https://e-commerce-bazario-pk-dwu6.vercel.app>

- Built a fully functional e-commerce website that is now live and **used by the client to sell** and manage products.
- Features include product browsing, a secure checkout, and order tracking. Added an admin panel, integrated payment gateways (Stripe, JazzCash), and implemented product recommendations.

EDUCATION

Bachelor of Science in Software Engineering

COMSATS University Islamabad, Wah Cantt Campus

📅 09/2021 - 07/2025 📍 Wah Cantt, Punjab, Pakistan | CGPA: 3.56

TRAINING / COURSES

[The Ultimate Html5 & CSS3 Series](#)

[JavaScript Basics for Beginners](#)

[The Ultimate TypeScript Course](#)

[React_ Intermediate Topics \(Part 1 and 2\)](#)

[Node.js The Complete Guide to Build RESTful APIs \(15hrs\)](#)

[Mastering Next.js 13 with TypeScript \(5.2hrs\)](#)

FINAL YEAR PROJECT

AI Poultry Management System (Next.js)

Real time AI poultry health & disease detection. Automated egg counting & Farm chatbot (Gemini). Feed Optimization. Systematically provide solution to poultry sheds.

92% improvement in poultry health monitoring efficiency. **100K+** monthly savings by reducing manual egg counting. [LINK](#)

SKILLS

Frameworks: Mern stack, Next.js, Fast, Flask. Languages: TypeScript, JavaScript, Python. DB: MongoDB, Supabase, Postgres, MySQL. Deploy: Vercel, Render, Railway, Hostingr.

HTML5/CSS3, Tailwind, zustand, TanStack. Dsa, System Design & Engineering principles. SEO, Yolov8, Tensorflow, Git, Github, resend Websockets, Payment Gateways, Docker, 3rd-Party APIs, little Aws, microservices.

PROJECTS

Plant Disease Recognition System

- Developed AI-SAAS app that analyzes plant images to detect diseases, helping farmers improve yield and reduce losses. [LINK](#)

Messaging System

- WebSockets, featuring authentication, user profiles and settings, one-to-one messaging. [LINK](#)

Employee Management System

- It has attendance, payroll, performance, leaves, and reporting for small companies.
- Included chat system, email integration, and cron jobs. [LINK](#)

INTERESTS

Hobbies

Arm wrestling, gym and cricket
Daily **coffee** enthusiast ☕
Curious about the **food** and restaurants
Polite listener and thoughtful adviser
